# How HOME911 Works

In an emergency, a HOME911 MEMBER presses the speed dial button on his/her cellphone. A call is then made to the HOME911 monitoring centre.

The call rings once, then is disconnected (no charge) and HOME911 then immediately alerts (via SMS) all the member's ALERT RECIPIENTS simultaneously that he/she needs urgent help. This process is completed in ±30 seconds.

The ALERT RECIPIENTS can then take action in assisting the HOME911 MEMBER in distress.

HOME911 logs, confirms and records all SMS deliveries.

**With HOME911, thousands of subscribers across South Africa "have the peace of mind that, at a touch of a button," they can contact up to 10 people for assistance 24 hours a day, 365 days a year.**

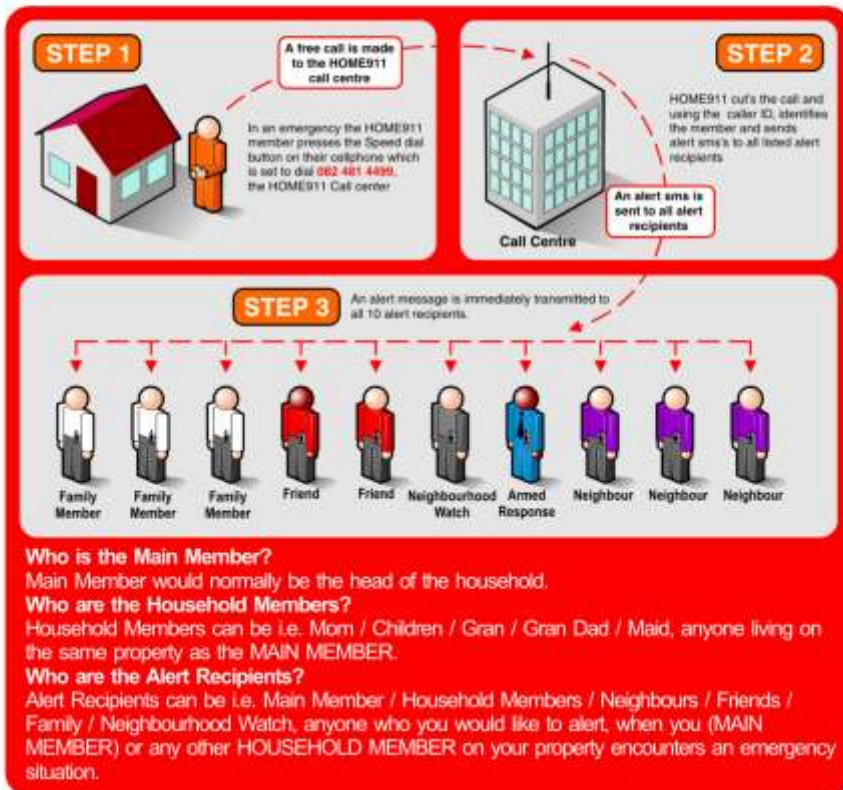

## How Do I Subscribe?

### VIA OUR SECURE ON LINE WEBSITE

Visit our website at [www.home911.co.za](http://www.home911.co.za), click on the Subscribe button and enter the required details (use sponsor code listed below), once you have submitted the relevant information, you will receive an activation SMS, confirming that you, your family members and alert recipients are now activated on the HOME911 system.

### VIA A HOME911 AGENT

Complete the subscription form which your agent will supply. The agent will enter your information onto the HOME911 system on your behalf. Once this has been completed you will receive an activation SMS, confirming that you, your family members and alert recipients are now activated on the HOME911 system.
